REPORT ON ECONOMIC POSITION

MARKETS, BUSINESS CLIMATE AND THE INDUSTRY ENVIRONMENT

Weak growth experienced in the previous year proved to be pronounced and persistent in the first half of 2019. After initial progress in trade talks between the US and China, the US government's decision to impose further tariffs on Chinese goods created a sense of pessimism regarding economic expectations.

The eurozone suffered particularly on the back of declining global momentum as it is closely integrated in global supply chains. Nonetheless, the negative impact of non-recurring factors in 2018 declined and so growth of 0.4% was still achieved in the first quarter of 2019. In the US, the country's longest ever government shutdown, a cold snap and flagging momentum from past tax reforms squeezed consumer growth. Despite this, the US economy still enjoyed annualised growth of 3.1% in the first quarter 2019 thanks to rising investment and public spending and declining imports.

Growth performance in emerging markets was also strained by weak global momentum. At the same time, money policy easing in major economies created financing conditions that help shore up growth in the form of lower yields, stronger currencies and thus

more room for manoeuvre when it comes to economic policy. In addition to foreign trade weaknesses and a return to escalation in the trade conflict with the US, the Chinese economy was also hit by a faltering domestic economy. Annual GDP growth was 6.2% in the second quarter of 2019.

Turning to interest rates, investors in the first half of the year increasingly focused their attention on potential negative economic ramifications that could result from existing (geo) political risks, in particular the ongoing threat of a global trade war. Negative economic data supported this cautious approach. Yields on ten-year German government bonds ended the first half of the year at a year-to-date low of -0.33%. Spread products, on the other hand, were heavily favoured in investment despite the economic slowdown. With the exception of a temporary correction in May, risk premiums for bank and corporate bonds continued to narrow significantly, which – in conjunction with falling market interest rates – resulted in an unexpectedly strong half-year performance.

The macroeconomic environment beyond the capital markets had a beneficial effect on the insurance industry. The global trend towards higher insurance premiums seen in recent years continued in the first half of 2019. Total claims from natural catastrophes were on par with the previous year and thus in line with average figures for the last 30 years. The most costly single event was the flooding in North Queensland (Australia) at the start of the year. Large losses were reported in Germany in relation to the "Eberhard" storm in March and the "Jörn" hail storm in June.

¹⁾ Annualised ratio of net investment income excluding interest income on funds withheld and contract deposits and profit on investment contracts to average assets under own management.

²⁾ Ratio of annualised net income for the period excluding non-controlling interests to average equity excluding non-controlling interests.

PREMIUM VOLUME

In the first half of 2019, the Talanx Group achieved a double-digit increase in gross written premiums of 11.2% (10.1% adjusted for currency effects) to EUR 20.9 (18.8) billion. This played a key role in boosting premiums by 21.3% in the Property/Casualty Reinsurance

segment. Net premiums earned were 10.3% higher year-on-year at EUR 15.9 (14.4) billion. Despite lower retention in the Industrial Lines and the Life/Health Reinsurance segments, the Group retention ratio increased by 0.2 percentage points to 88.5% (88.3%).

UNDERWRITING RESULT

The underwriting result improved by 5.5% to EUR -708 (-748) million. The large loss burden in the first half of the year was EUR 308 (241) million, thereby remaining significantly below the budget for the period of around EUR 527 million. The Industrial Lines and Reinsurance divisions accounted for the largest share of this, with both reporting a similar level of large losses. The Group combined ratio increased by 0.8 percentage points year-on-year to 97.5% (96.7%). The declining expense ratio could not offset the higher loss ratio, which essentially stemmed from the Property/Casualty Reinsurance segment.

NET INVESTMENT INCOME

Despite the decline in extraordinary net investment income, net investment income fell only slightly, decreasing by 1.1% to EUR 1,986 (2,007) million. The Retail Germany Division posted lower realised gains to finance the additional interest reserve and there was a positive non-recurring effect of EUR 100 million in the Life/Health Reinsurance segment. The Group's net return on investment was 3.3% (3.5%) in the first half of 2019 and thus slightly lower year-on-year.

OPERATING PROFIT AND GROUP NET INCOME

EBIT climbed to EUR 1,244 (1,212) million, thanks in part to a better net underwriting result. Group net income saw a 9.4% upturn to EUR 477 (437) million, driven chiefly by results in the Retail Germany and Retail International divisions as well as in the Life/Health Reinsurance segment. The return on equity was up 0.4 percentage points year-on-year at 10.4% (10.0%).

DEVELOPMENT OF THE DIVISIONS WITHIN THE GROUP

At a strategic level, Talanx divides its business into seven reportable segments: Industrial Lines, Retail Germany – Property/Casualty and Life Insurance –, Retail International, Property/Casualty Reinsurance, Life/Health Reinsurance and Corporate Operations. Please refer to the section entitled “Segment reporting” in the Notes to the Talanx 2018 Group Annual Report for details of these segments’ structure and scope of business.

INDUSTRIAL LINES

- Premium development shaped primarily by initial consolidation of HDI Global Specialty
- Fire insurance benefiting from improved frequency loss ratio
- Run-off positive overall but influenced in particular by reserve strengthening of a large loss
- Net investment income up on previous year

KEY FIGURES FOR THE INDUSTRIAL LINES DIVISION

EUR MILLION

	6M 2019	6M 2018	+/-%
Gross written premiums	3,483	2,898	+20.2
Net premiums earned	1,367	1,235	+10.7

Return on equity ³⁾	3.4	4.6	-1.2 pt.

¹⁾ Taking into account interest income on funds withheld.

²⁾ Operating profit (EBIT)/net premiums earned.

³⁾ Ratio of annualised net income for the period excluding non-controlling interests to average equity excluding non-controlling interests.

The division pools global activities relating to industrial insurance within the Talanx Group and, as well as its excellent presence on the German market, also operates in over 150 countries through its foreign branches, subsidiaries, affiliates and network partners. In July 2019, HDI Global Specialty SE acquired 76.5% of Svedea AB from Hannover Rück SE and Svedea Management. Svedea AB is a managing agent that markets non-life specialty insurance products on the Swedish market.

PREMIUM VOLUME

Gross written premiums for the division amounted to EUR 3.5 (2.9) billion as at 30 June 2019, an increase of around 20.2% (18.7% after adjustment for currency effects). Increases in premiums were essentially generated from the initial consolidation of HDI Global Specialty. Restructuring measures in fire insurance launched in 2018 are showing clear success. The expected premium loss associated with this on account of separating inadequately priced risks was partially offset by risk-free additional premiums. Net premiums earned saw a smaller upturn than gross written premiums due to lower retention in specialty business in comparison to traditional industrial insurance business.

UNDERWRITING RESULT

At EUR -32 (-28) million, the net underwriting result in the division was down on the previous year. The loss burden was higher than expected on account of reserve strengthening in the first quarter of a large loss in the previous year. Earnings were also squeezed as the large loss budget for the year so far was exceeded slightly. This was countered by the effects of the 20/20/20 programme, which improved both the large loss ratio and the frequency loss ratio in fire insurance. Thus, the overall loss ratio was at 80.9% and below the previous year's of 81.5%. The combined ratio for the Industrial Lines Division was 102.3% (102.3%).

NET INVESTMENT INCOME

At EUR 133 million, net investment income was up 7.5% year on year (EUR 124 million). Higher income was generated from fixed-income securities and real estate thanks to the upturn in investment volume.

OPERATING PROFIT AND GROUP NET INCOME

As a result of the developments stated above, the division's operating profit was lower in the first half of 2019 (EUR 69 million) than in the same period of the previous year (EUR 78 million). This includes foreign exchange losses of EUR -2 million (previous year: EUR -17 million), which are also included in operating profit/loss. Group net income amounted to EUR 42 (53) million.

RETAIL GERMANY

PROPERTY/CASUALTY INSURANCE

- Significant growth in corporate customers/freelance professionals
- Rise in EBIT thanks to improved net investment income

KEY FIGURES FOR THE RETAIL GERMANY DIVISION – PROPERTY/CASUALTY INSURANCE SEGMENT

EUR MILLION

	6M 2019	6M 2018	+/-%
Gross written premiums	1,042	1,022	+2.0

Combined ratio (net) ¹⁾	98.7	99.0	-0.3 pt.
EBIT margin ²⁾	7.4	5.6	+1.8 pt.

¹⁾ Taking into account interest income on funds withheld.²⁾ Operating profit (EBIT)/net premiums earned.

PREMIUM VOLUME AND NEW BUSINESS

Premiums rose by 2.0% to EUR 1,042 (1,022) million in the Property/Casualty Insurance segment in the first half of the year. Growth in corporate customers/freelance professionals and third-party liability, accident and property business comfortably offset the decline from motor vehicle insurance.

UNDERWRITING RESULT

The underwriting result was EUR 10 (8) million in the current financial year, up 31.2% on the previous year. While profitable growth had a positive impact on the underwriting result in third-party liability, accident and property lines of business, burdens were slightly higher due to natural disasters and large loss events. Investment expenditure continued to increase in the last six months, in particular in IT. Despite these burdens, the overall combined ratio (net) improved by 0.3 percentage points from 99.0% to 98.7%.

NET INVESTMENT INCOME

Net investment income improved to EUR 55 (44) million thanks to the rise in ordinary and extraordinary investment income. This was driven primarily by higher income from properties and positive impairments on unrealised gains/losses.

OPERATING PROFIT/LOSS

EBIT rose to EUR 54 (40) million, due essentially to higher net investment income. This pushed the EBIT margin up to 7.4% (5.6%).

LIFE INSURANCE

- Growth in single premium business
- Lower gains realised to finance additional interest reserve

KEY FIGURES FOR THE RETAIL GERMANY DIVISION – LIFE INSURANCE SEGMENT

EUR MILLION

	6M 2019	6M 2018	+/-%
Gross written premiums	2,285	2,240	+2.0
Net premiums earned	1,696	1,653	+2.6
Underwriting result	-664	-858	+22.6
Net investment income	753	922	-18.3
Operating profit (EBIT)	71	48	+46.8

Regular premiums	129	127	+1.6
New business by product in annual premium equivalent	205	195	+5.1
of which capital-efficient products	86	73	+17.8
of which biometric products	69	66	+4.5

MANAGEMENT METRICS FOR THE LIFE INSURANCE SEGMENT

%

	6M 2019	6M 2018	+/-%
Gross premium growth	2.0	-3.0	+5.0 pt.
EBIT margin ¹⁾	4.2	2.9	+1.3 pt.

¹⁾ Operating profit (EBIT)/net premiums earned.

PREMIUM VOLUME AND NEW BUSINESS

In the first half of the year, the Life Insurance segment saw premiums rise by 2.0% to EUR 2.3 (2.2) billion, which includes the savings elements of premiums from unit-linked life insurance policies. Single premiums (excluding residual debt) climbed by EUR 60 million year on year, driven in particular by the sale of capital-efficient products. This was countered by a drop-off in regular premiums (excluding residual debt), primarily the result of a high number of contracts expiring. Biometric core business of bancassurance performed well, with growth of EUR 21 million. The retention ratio in life insurance business rose slightly to 93.7% (93.4%). Allowing for the savings elements of premiums from our unit-linked products and the change in the unearned premium reserve, net premiums earned in the Life Insurance segment increased by 2.6% to EUR 1,696 (1,653) million.

Measured in APE, new business in life insurance products rose from EUR 195 million to EUR 205 million.

UNDERWRITING RESULT

The underwriting result improved to EUR –664 (–858) million in the current financial year. This was partly due to the unwinding of discounts on the technical provisions and policyholder participation in net investment income. These expenses are offset by investment income, which is not recognised in the underwriting result.

NET INVESTMENT INCOME

Net investment income declined by 18.3% to EUR 753 (922) million. In particular, the reduction resulted from lower realisation of unrealised gains to finance the additional interest reserve. Given that it could not yet be safely assumed a year ago that the corridor method would have a positive impact on the additional interest reserve, correspondingly high realisations were made. Ordinary investment income was virtually unchanged year-on-year at EUR 724 (727) million.

OPERATING PROFIT/LOSS

Operating profit (EBIT) in the Life Insurance segment in the Retail Germany Division rose year-on-year to EUR 71 (48) million.

RETAIL GERMANY DIVISION OVERALL

RETURN ON EQUITY FOR THE RETAIL GERMANY DIVISION OVERALL

	6M 2019	6M 2018	+/- %
Return on equity ¹⁾	5.8	4.0	+1.8 pt.

¹⁾ Ratio of annualised net income for the period excluding non-controlling interests to average equity excluding non-controlling interests.

After adjusting for taxes on income, financing costs and non-controlling interests, Group net income rose to EUR 72 (50) million, thanks especially to improved earnings in Property/Casualty and Life Insurance. This pushed the return on equity up by 1.8 percentage points to 5.8%.

RETAIL INTERNATIONAL

- Gross written premiums rose by 9.2% adjusted for currency effects
- Combined ratio virtually stable at ~ 95%

KEY FIGURES FOR THE RETAIL INTERNATIONAL DIVISION

EUR MILLION	6M 2019	6M 2018	+/- %

Return on equity ³⁾	8.5	8.4	+0.1 pt.

¹⁾ Taking into account interest income on funds withheld.

²⁾ Operating profit (EBIT)/net premiums earned.

³⁾ Ratio of annualised net income for the period excluding non-controlling interests to average equity excluding non-controlling interests.

This division bundles the activities of the international retail business in the Talanx Group and is active in both Europe and Latin America. In the Europe region, the Turkish HDI Sigorta A. S. signed an agreement on 2 May 2019 to acquire the Turkish Ergo Sigorta A. S., with the aim of further expanding its market presence. The transaction is still subject to approval by the Turkish supervisory authority, but this is expected in the second half of the year. In Latin America, however, the division streamlined its portfolio in the first half of 2019, entering into an agreement to sell its 100% interest in HDI Seguros S. A., San Isidro, Peru, on 22 October 2018 which was then completed at the end of the first quarter of 2019.

PREMIUM VOLUME

The division's gross written premiums (including premiums from unit-linked life and annuity insurance) increased by 6.5% compared to the first half of 2018 to EUR 3.2 (3.0) billion. Adjusted for currency effects, gross premiums increased by 9.2% on the comparison period. Premium volume performed well in the two regions during the reporting period.

The Europe region reported growth in gross written premiums of 7.1% to EUR 2.3 billion; this growth was driven primarily by a 13.9% increase in premiums to EUR 910 million at the Italian HDI Assicurazioni S.p.A. TUIR WARTA S.A in Poland also reported positive effects on gross written premiums for the region, with premium volume up by 3.6% thanks to a higher number of insured vehicles in motor vehicle insurance. Adjusted for currency effects, the growth in premium volume in Europe stood at 9.2%.

In the Latin America region, gross written premiums increased by 6.2% compared to the same period of the previous year to EUR 863 million. Adjusted for currency effects, the growth amounted to 10.4%, which was essentially due to good performance in Mexico and Brazil. At the Mexican HDI Seguros S.A., premium volumes enjoyed a particular upturn in motor vehicle insurance thanks to new intermediaries and agents. 44.9% of the premium volume generated in the region was accounted for by the Brazilian HDI Seguros S.A. Unadjusted, the company's gross written premiums rose by 1.2% to EUR 387 million. However, adjusted for currency effects, they rose by 6.5%, primarily on account of changes to wage agreements in motor vehicle insurance.

UNDERWRITING RESULT

The combined ratio from property insurance companies increased by 0.6 percentage points year-on-year to 95.2% (94.6%). This reflects exclusively a change to accounting requirements for allocating costs in the statement of income. Accordingly, the expense ratio for the division was 0.5 percentage points higher than the previous year (28.3%), at 28.8%. The loss ratio was unchanged year on year.

In line with higher net investment income in life insurance, the underwriting result in life insurance fell by EUR 6 million.

NET INVESTMENT INCOME

Net investment income rose year-on-year by 8.7% to EUR 189 (174) million. The division's ordinary net investment climbed by 14.0% against the first half of 2018, essentially driven by higher investment volumes in Italy and higher interest rates and investment volumes in Turkey. Owing to the higher volume of investments and overall persistently low interest rates, the return on assets under own management was on par with the previous year at 3.4%.

OPERATING PROFIT AND GROUP NET INCOME

In the first half of 2019, operating profit (EBIT) in the Retail International Division rose by 6.2%, compared with the same period of the previous year, to EUR 146 (138) million. The Europe region contributed to the division's operating profit with EBIT of EUR 134 (117) million, an increase of 14.7%, whereby this growth was primarily due to developments at TUIR WARTA S.A. in Poland. By contrast, EBIT of EUR 34 (29) million was generated in the Latin America region. Group net income after minority interests increased accordingly by 2.6% to EUR 85 (83) million. The return on equity rose by 0.1 percentage points to 8.5% compared to the same period in the previous year.

BUSINESS DEVELOPMENT

Global property/casualty reinsurance markets continue to be shaped by stiff competition and the supply of reinsurance cover still exceeds demand. In particular in the case of natural disaster risks, the additional capacity from the market for insurance-linked securities (ILS) is putting sustained pressure on prices and conditions.

Despite the challenging conditions, the treaty renewal rounds in the first half of the year were satisfactory from our perspective and make us optimistic about the year as a whole. Contrary to the situation one year ago, alternative capital providers were more cautious when it came to transferring insurance risks to the capital market in the renewal negotiations during the year. Overall, reinsurance prices remained in line with risk and we obtained slightly better conditions. As one of the world's leading reinsurers, we continue to benefit from our excellent financial standing, as well as from a recovery in demand on the part of primary insurers. For example, attractive opportunities opened up to expand our portfolio in Asia, North America and Germany.

Following the successful treaty renewal round in the Property/Casualty Reinsurance segment as at 1 January 2019, the treaty renewal as at 1 April also went well. Traditionally, business in Japan is renewed at this time and a lower number of treaty renewals are also due for Australia, New Zealand, Asian markets and North America. Rates in Japan improved substantially following natural disaster losses and we boosted our premium income. Our premium income also picked up considerably on the Indian market. The renewal of part of our North America business was highly satisfactory, continuing the trend from the renewals as at 1 January. Prices in the natural catastrophe business consolidated on the whole, whereas programmes that have been affected by losses saw double-digit increases. The total premium volume from the treaty renewal round as at 1 April 2019 increased by 7%.

PREMIUM DEVELOPMENT

Gross written premiums for the entire portfolio in the Property/Casualty Reinsurance segment increased by 21.3% to EUR 7.8 (6.5) billion as at 30 June 2019. This again reflected the ongoing increase in demand for solvency-easing reinsurance solutions and traditional reinsurance coverage. At constant exchange rates, the growth in gross written premiums in the Property/Casualty Reinsurance segment would have amounted to 18.4%. Retention increased only marginally year-on-year to 91.5% (91.4%). Net premiums earned increased by 15.2% to EUR 6.0 (5.2) billion, or by 13.0% adjusted for currency effects.

UNDERWRITING RESULT

The net large loss burden as at 30 June 2019 was up year-on-year at EUR 141 (93) million. The largest losses in the first half of the year included the explosion in a Philadelphia refinery in June, with an estimated net participation of EUR 46 million, the floods in Queensland, Australia, at the end of January with EUR 26 million and the crash of the Ethiopian Airlines Boeing 737 MAX in March with EUR 25 million. In total, the large loss burden was well below our forecast of EUR 370 million for the first half of the year. We classify large losses as catastrophes for which we expect to pay out over EUR 10 million in gross claims and claims expenses.

As well as large losses in the current year, in the second quarter we also received late claim notifications from our customers for typhoon “Jebi” in Japan in the previous year in the amount of EUR 106 million net. Our retrocession programmes protect us in the event of additional subsequent reserves from these losses in the future. Overall, in the first half of the year the subsequent reserves offset the once again positive run-off of our loss reserve from previous years.

The technical result, including interest on deposits, for the Property/Casualty Reinsurance segment declined by 16.1% to EUR 174 (206) million. At 96.7% (95.7%), the combined ratio was slightly higher than in the previous year but remained in line with our planning for a target of 97% or less for the year as a whole.

NET INVESTMENT INCOME

Net investment income from assets under own management in the Property/Casualty Reinsurance segment declined by 3.1% to EUR 485 (501) million. Net investment income amounted to EUR 508 (517) million in total.

OPERATING PROFIT/LOSS

Operating profit (EBIT) for the Property/Casualty Reinsurance segment decreased by 6.1% to EUR 662 (704) million. The EBIT margin again exceeded our target level of at least 10% at 11.1% (13.6%).

LIFE/HEALTH REINSURANCE

- Growth of 7.4% in written premiums adjusted for currency effects
- Sustained strong global demand for financial solutions
- Extraordinary income from restructuring of shares at Viridium
- Operating profit up 32.6%

BUSINESS DEVELOPMENT

Global life/health reinsurance markets remained characterised by continued low interest rates. Competition was also unchanged and remained extremely intense in some regions. In Australia, disability income insurance had a negative impact on the sector as a whole. Global demand for financial solutions remains high. These include individual reinsurance solutions to improve our customers' solvency, liquidity and capital.

The restructuring of shareholdings for our stake in the German run-off specialist Viridium resulted in extraordinary income of EUR 99.5 million in the second quarter as a result of Viridium's acquisition of Generali Lebensversicherung AG. Hannover Re's share in Viridium remained largely unchanged. Various reinsurance treaties in the United Kingdom and Australia were not satisfactory. We have strengthened the respective reserve positions here.

In the US, new business in the area of mortality solutions performed better than expected. This was offset by a slight downturn in existing business. Thanks to good new business, our expectations in the area of financial solutions were slightly exceeded. In Australia, regulatory changes and higher reserves strained net income. We are observing sustained high demand for tailor-made financial solutions in China, while the area of longevity is enjoying buoyant demand, particularly in Canada, the Netherlands and France.

PREMIUM DEVELOPMENT

The gross premium volume in the Life/Health Reinsurance segment rose by 9.3% to EUR 3.8 (3.5) billion as at 30 June 2019. At constant exchange rates, the growth would have amounted to 7.4%. Our retention declined to 88.9% (91.2%). Net premiums earned grew by 7.0% to EUR 3.4 (3.2) billion. At constant exchange rates, the growth would have amounted to 5.2%.

NET INVESTMENT INCOME

Income from assets under own management in the Life/Health Reinsurance segment doubled to EUR 294 (141) million, essentially thanks to releasing hidden reserves as part of the restructuring of shares at Viridium discussed above. Net investment income came to EUR 364 (239) million.

OPERATING PROFIT/LOSS

The operating profit (EBIT) was EUR 282 (213) million at the end of the first half of the year, up 32.4% on the prior-year figure. This is significantly higher than the target of at least 5% that we set for EBIT growth in 2019.

REINSURANCE DIVISION OVERALL

	6M 2019	6M 2017	+/- %
Return on equity ¹⁾	14.7	13.9	+0.8 pt.

¹⁾ Ratio of annualised net income for the period excluding non-controlling interests to average equity excluding non-controlling interests.

Group net income in the Reinsurance Division climbed by 17.0% to EUR 329 (281) million in the first half of the year, while the return on equity improved to 14.7% (13.9%).

CORPORATE OPERATIONS

- Group assets under own management climb by 6%
- Talanx AG to write underwriting risks for the first time from 2019
- Gross written premiums in the Corporate Operations segment up 18%

Talanx AG was awarded a reinsurance license by the Federal Financial Supervisory Authority (BaFin) and will write underwriting risks for the first time from 2019. This allows us to pool the reinsurance requirements for primary insurance at the holding company in order to take advantage of diversification effects throughout the Group, boost additional earnings potential and better implement group-wide retrocession cover. Thanks to pooling intragroup reinsurance, Standard & Poor's, as well as other rating agencies, has already raised Talanx AG's issuer rating from "A-" to "A+".

THE GROUP'S REINSURANCE SPECIALISTS

Underwriting business written via our Irish subsidiary HDI Reinsurance (Ireland) SE (previously: Talanx Reinsurance (Ireland) SE) has been reported in the Corporate Operations segment since 2013 and partially ceded to Talanx AG via a quota share reinsurance agreement since 2019. Some business is also reallocated to the ceding intra-group segments in order to leverage diversification benefits there. Business including additional cross-segment diversification benefits is reported in the Corporate Operations segment. Gross written premiums in this business amounted to EUR 46 (39) million in the first half of 2019. They resulted from reinsurance cessions in the Industrial Lines, Retail Germany and Retail International Divisions. The underwriting result in the Corporate Operations segment was EUR -9 (-1) million in the first half of 2019 and was characterised by additional reserves recognised in conjunction with commencing insurance business by Talanx AG.

THE GROUP'S INVESTMENT SPECIALISTS

In cooperation with its subsidiary Ampega Investment GmbH, Ampega Asset Management GmbH (previously: Talanx Asset Management GmbH) is chiefly responsible for handling the management and administration of the Group companies' investments and provides related services such as investment accounting and reporting. The Group's assets under own management have climbed to EUR 119 (112) billion since the beginning of the year. The total contribution to the segment's operating profit made by the two companies and Ampega Real Estate GmbH (previously: Talanx Immobilien Management GmbH) amounted to EUR 22 (29) million in the first half of 2019.

As an investment company, Ampega Investment GmbH manages retail and special funds and provides financial portfolio management services for institutional clients. It focuses on portfolio management and the administration of investments. The German investment industry was shaped by two countervailing effects in the first half of 2019. Firstly, price losses on the stock and bond market in the fourth quarter 2018 were recovered and to some extent offset thanks to significantly higher valuations, resulting in a considerable upturn in volume in comparison to the end of 2018. On the other hand, retail funds – including ETFs – were dominated by cash outflows in the first half of the year of 2019. Growth momentum also visibly slackened in comparison to previous years in institutional business. The total volume of assets managed by Ampega Investment GmbH rose by 9.5% against the figure at the beginning of the year to EUR 26.2 (23.9) billion. At EUR 12.4 (11.5) billion, half the total volume is managed on behalf of Group companies using special funds and direct investment mandates. Of the remainder, EUR 6.8 (6.0) billion was attributable to institutional third-party clients and EUR 7.0 (6.4) billion to retail business. The latter is offered both through the Group's own distribution channels and products such as unit-linked life insurance and through external asset managers and banks.

OPERATING PROFIT/LOSS

The operating profit in the Corporate Operations segment decreased to EUR –10 (4) million in the first half of 2019, essentially as a result of additional reserves recognised in conjunction with commencing insurance business by Talanx AG and the bonus fee for the placement of a bond of EUR 832 million to finance the “Borkum Riffgrund 2” offshore wind farm in the previous year. Group net income attributable to shareholders of Talanx AG for this segment amounted to EUR –50 (–37) million in the first half of 2019.

NET ASSETS AND FINANCIAL POSITION

NET ASSETS

- Total assets up EUR 10.7 billion to EUR 173.6 billion
- Investments account for 75% of total assets

SIGNIFICANT CHANGES IN THE ASSET STRUCTURE

The EUR 10.7 billion increase in our total assets to EUR 173.6 billion is primarily attributable to the growth in investments (up EUR 7.3 billion), investments for the benefit of life insurance policyholders who bear the investment risk (up EUR 1.2 billion) and the increase in accounts receivable on insurance business (up EUR 1.1 billion).

CHANGE IN INVESTMENTS

The total investment portfolio increased by 6.0% over the course of the first half of 2019 and amounted to EUR 130.2 (122.8) billion. The portfolio of assets under own management climbed by 6.1% to EUR 118.7 (111.9) billion. The rise in the portfolio of assets under own management is predominantly market-driven. Cash inflows from underwriting business were reinvested in accordance with the respective corporate guidelines, while the portfolio of investment contracts remains constant at EUR 1.1 billion. Funds withheld by ceding companies expanded slightly by 4.1% to EUR 10.3 (9.9) billion.

Fixed-income investments were again the most significant asset class in the first half of 2019. Reinvestments were made taking into account the existing investment structure in this asset class. This asset class contributed EUR 1.4 (1.3) billion to earnings, which was reinvested as far as possible in the year under review.

The equity allocation ratio after derivatives (equity ratio of listed securities) was 0.8% (1.0%) at the end of the six-month period.

FIXED-INCOME SECURITIES

The portfolio of fixed-income investments (excluding mortgage and policy loans) was up by EUR 6.2 billion in the first half of 2019 to total EUR 106.8 (100.6) billion at the end of the six-month period. At 82% (82%) of total investments, this asset class continues to represent the most significant share of our investments by volume. Fixed-income investments were primarily divided into the investment categories of “Loans and receivables” and “Financial assets available for sale”.

“Fixed-income securities available for sale”, whose volatility impacts equity and which total EUR 76.5 (70.2) billion, or 72% (70%) of total investments in the fixed-income portfolio, account for the largest share and increased by approximately EUR 6.3 billion in the first half of the year. Valuation reserves, i.e. the balance of unrealised gains and losses, have also risen from EUR 1.7 billion to EUR 5.4 billion since the end of 2018 with lower interest rates and spreads.

In the “Loans and receivables” category, investments are primarily held in government securities or securities with a similar level of security. German covered bonds (Pfandbriefe) are still the largest item in the portfolio. Total holdings in fixed-income securities within the category “Loans and receivables” amounted to EUR 29.2 (29.1) billion at the end of the six-month period and thus represent 27% of total holdings in the asset class of fixed-income investments. Off-balance-sheet valuation reserves of “Loans and receivables” (including mortgage and policy loans) increased from EUR 3.8 billion to EUR 5.7 billion.

Investments in fixed-income securities continue to focus on government bonds with good ratings or securities from issuers with a similar credit quality in 2019. Holdings of AAA-rated bonds amounted to EUR 45.1 (43.1) billion as at the reporting date. This represents 42% (42%) of the total portfolio of fixed-income securities and loans.

RATING STRUCTURE OF FIXED-INCOME SECURITIES

%

The Group pursues a conservative investment policy. As a result, 78% (78%) of securities in the fixed-income securities asset category have a minimum A rating.

The Group has only a small portfolio of investments in government bonds from countries with a rating lower than A-. On a fair value basis, this portfolio amounts to EUR 4.3 (4.1) billion and therefore corresponds to a share of 3.7% (3.7%) of the assets under own management.

As far as matching currency cover is concerned, US dollar-denominated investments continue to account for the largest share at 19% (19%) of the Talanx Group's foreign currency portfolio. Sizeable positions are also held in pound sterling, Polish zloty and Australian dollars, totalling 8% (8%) of all investments. The total share of assets under own management in foreign currencies was 32% (32%) as at 30 June 2019.

EQUITIES AND EQUITY FUNDS

Net unrealised gains and losses on equity holdings within the Group (excluding “Other investments”) rose by EUR 46 million to EUR 120 (74) million.

REAL ESTATE INCLUDING SHARES IN REAL ESTATE FUNDS

Investment property totalled EUR 2.9 (3.0) billion at the reporting date. An additional EUR 1,072 (985) million is held in real estate funds, which are recognised as “Financial assets available for sale”.

Depreciation of EUR 30 (28) million was recognised on investment property in the reporting period. There were no significant impairment losses. Depreciation on real estate funds stood at EUR 5 (6) million. These depreciations were offset by negligible reversals of impairment losses.

INFRASTRUCTURE INVESTMENTS

Talanx currently has a total of around EUR 2.2 (2.1) billion invested in infrastructure projects.

NET INVESTMENT INCOME

CHANGE IN NET INVESTMENT INCOME

EUR MILLION

	6M 2019	6M 2018
Ordinary investment income	1,778	1,687
of which current income from interest	1,399	1,329
of which attributable to profit/loss from investments in associates	14	4
Realised net gains on disposal of investments	268	419
Write-downs/reversals of write-downs of investments	-96	-79
Unrealised net gains from investments	73	-6
Other investment expenses	-125	-120
Income from assets under own management	1,898	1,901
Net interest income from funds withheld and contract deposits	87	106
Net income from investment contracts	1	-
Total	1,986	2,007

The net investment income in the first half of the year was EUR 1,986 (2,007) million, and so was slightly below the previous year's level. The annualised net return on investment for the assets under own management fell to 3.3% (3.5%).

Ordinary investment income at the end of the six-month period was EUR 1,778 (1,687) million. Persistently low interest rates on the capital markets led to an average coupon in the fixed-income securities portfolio of 2.8% (2.9%). The current interest income included in the investment income amounts to EUR 1.4 (1.3) billion.

Overall, realised net gains on the disposal of investments were below the prior-year figure, at EUR 268 (419) million. This includes earnings of EUR 100 million from restructuring shares at the Viridium Group in the “Life/Health Reinsurance” segment. In addition, the positive net gains resulted from regular portfolio turnover in all segments, as well as from the requirement to realise unrealised gains in order to finance the additional interest reserve required by the HGB for life insurance and occupational pension plans. The latter were down significantly against the previous year.

At EUR 96 (79) million, higher depreciation and amortisation was required overall in the first half of this year compared to the prior year. This year, equities accounted for EUR 5 (10) million of this figure, fixed-income securities for EUR 2 (7) million and other investments for EUR 42 (18) million in total. Depreciation on directly held property and infrastructure investments amounted to EUR 47 (44) million.

Unrealised net gains/losses improved considerably on balance from EUR –6 million to EUR 73 million. The rise was driven by changes in our assets held at fair value through profit or loss. This includes unrealised net gains/losses on modified coinsurance derivatives in the Life/Health Reinsurance segment of EUR 9 (–6) million.

Net interest income from funds withheld and contract deposits fell to EUR 87 (106) million.

FINANCIAL POSITION

ANALYSIS OF CAPITAL STRUCTURE

- Equity was up year-on-year at EUR 15.6 (14.3) billion
- Technical provisions climbed EUR 6. billion to EUR 123.5 billion

SIGNIFICANT CHANGES IN THE CAPITAL STRUCTURE

Overall, net technical provisions rose by 5.9% or EUR 6.4 billion year-on-year to EUR 115.2 (108.8) billion. This increase essentially related to the unearned premium reserve (up EUR 2.2 billion), the provision for premium refunds (up EUR 2.0 billion) and the loss and loss adjustment expense reserve (up EUR 1.6 billion).

The ratio of net provisions in the insurance business to total investments, including funds withheld by ceding companies but excluding investments under investment contracts, was 89.3% (89.4%) at the reporting date. Investments thus exceed provisions by EUR 13.8 (13.0) billion.

EQUITY

CHANGE IN EQUITY

The EUR 771 million increase in accumulated other comprehensive income and other reserves as against 31 December 2018 to EUR 514 million and the net income for the reporting period, EUR 477 (437) million of which is attributable to our shareholders and was allocated in full to retained earnings, essentially led to a rise of EUR 904 million (10.4%) in the Group’s equity against the figure as at 31 December 2018. This was offset by the dividend payment of EUR 367 (354) million to the shareholders of Talanx AG in May of the reporting period.

The increase in other reserves (EUR 771 million) is due in particular to the positive development of unrealised gains on investments – caused primarily by falling interest rates and declining risk premiums – (EUR 2,577), which was offset by changes in policyholder participation/shadow accounting (EUR –1,743 million).

¹⁾ Equity per division is defined as the difference between the assets and liabilities of each division.

ANALYSIS OF DEBT

Subordinated liabilities remained at EUR 2.7 billion as at the reporting date. Further information can be found in the Notes to the consolidated balance sheet, Note 8 "Subordinated liabilities".

As at 30 June 2019, the Group had two syndicated variable-rate credit lines with a total nominal value of EUR 500 million. As in the prior year, these were not drawn down as at the reporting date. The existing syndicated credit lines can be terminated by the lenders if there is a change of control, i.e. if a person or persons acting in concert, other than HDI Haftpflichtverband der Deutschen Industrie V.a.G., gains direct or indirect control over more than 50% of the voting rights or share capital of Talanx AG.

Further information can be found in the Notes to the consolidated balance sheet, Note 10 "Notes payable and loans".

In addition, a cooperation agreement with HDI V.a.G. allows the Group to offer HDI subordinated bonds with a maturity of five years and a volume of up to EUR 500 million on a revolving basis.

Further information can be found in the Notes to the consolidated balance sheet in the section "Other disclosures" – "Related party disclosures".

OTHER REPORTS AND DECLARATIONS

RISK REPORT

Our 2018 Annual Report describes our risk profile and the various types of risk in accordance with German Accounting Standard GAS 20. A detailed description of the various types of risks is not provided here; these are disclosed in the 2018 Annual Report on page 108ff. Risk reporting in this half-yearly financial report focuses on relevant changes to the risk position that have occurred since Talanx's 2018 Group Annual Report was prepared.

The summary of the overall risk position remains unchanged in this respect; there continues to be no discernible concrete risks that could have a material adverse effect on the Group's net assets, financial position or results of operations. The Talanx Group has established a functioning, appropriate system of governance and risk management, which is consistently refined and corresponds to demanding quality requirements and standards. We are therefore able to identify our risks in a timely manner, and manage them effectively.

The following risks – stated by their level of materiality – determine the Group's overall risk profile: risks in connection with investments, premium and reserve risk in property/casualty insurance; NatCat risk; life insurance underwriting risk; operational risk and reinsurance default risk. Similarly, diversification is becoming increasingly important with regard to assessing the overall risk. This results from our geographical diversity and the diversity of our business. As a result, the Group is well positioned, even if an accumulated materialisation of risks occurs.

Interest rates and their development are a key issue defining the current risk situation. For example, a prolonged period of low interest rates could have a material adverse effect on earnings and solvency in parts of the life insurance business due to increased interest guarantee and reinvestment risk. Life insurers and pension funds especially are countering the risks arising from low interest rates with extensive measures that improve their ability to satisfy their obligations to policyholders moving ahead.

In addition, spread risks for risky bond investments also pose a significant risk.

Systemic risks, especially to the stability of the financial market, can affect the Group directly as an actor in the financial market and can also affect it indirectly due to potentially negative consequences for its customers.

Likewise, political and macroeconomic uncertainty, on both existing core markets and our target and future markets, pose risks to our net assets, financial position and results of operations. In particular, these include Brexit and the uncertainty of the macroeconomic impact of US trade strategies.

Furthermore, there is uncertainty regarding the development of the legal framework for our business activities in all the countries in which the Group operates.

This poses specific legal risks for our German life insurance companies. This also includes tax risks relating to the handling of certain capital investment instruments in the course of company audits.

A draft bill was published by the German Federal Ministry of Finance (BMF) for an act that would cap sales commission from life insurance and residual debt insurance. It would limit sales commission and remuneration from life insurance policies to a maximum of 2.5% of the gross premium restricted to 35 years. The sales commission may be increased to up to 4% of the gross premium if certain qualitative criteria are met. When taking out residual debt insurance, the cap would be set at 2.5% of the insured loan amount. The planned statutory cap on commission would have a noticeable impact on the Group companies in question, in particular in relation to selling residual debt insurance.

Another specific risk is the political-economic crisis in Italy, as the Group also holds directly investments in Italian securities that could be vulnerable to impairment. Overall, however, these risks are very limited.

OUTLOOK

ECONOMIC ENVIRONMENT

At the beginning of the second half of the year, there are signs that global growth is stabilising. Nonetheless, downside risks still prevail in the global economic outlook. This is dominated by (geo)political risks, such as renewed escalation in the US-China trade dispute, the United Kingdom leaving the European Union without a deal, unsustainable debt in Italy on account of untenable fiscal policy and military escalation in the current US-Iran conflict.

In major industrialised nations, we expect to see growth rates return to or exceed the long-term potential. As well as looser monetary policy, the still healthy labour market is ensuring consumer potential. Rising capacity utilisation in conjunction with historically low financing costs is likely to bolster investment growth. A more stable global economic climate should also be reflected in a moderate rise in export growth figures.

The emerging markets are continuing their economic expansion as well – in spite of (geo)political conflicts and considerable problems facing the individual economies. In the light of the negative impact of the trade conflict with the US, the Chinese government seems willing to provide further economic stimulus to shore up growth. Global economic growth as a whole should benefit from the anticipated stabilisation of growth.

Weak growth at present is resulting in lower utilisation of production capacities and a general downturn in structural pressure on prices. Although positive wage growth and a return to growth momentum is likely indicative of a trend towards higher core inflation rates, no significant inflation is expected in the short to medium term.

CAPITAL MARKETS

Clear communication by central banks suggests that no interest rate turnaround is to be expected for the time being. Spread markets will also continue to be propped up by the low yield level due to a lack of investment alternatives.

The combination of an expected slowdown in global growth momentum and more expansive monetary policy provides general support for stock market developments. However, most of this positive expectation seems to be already reflected in share prices and so we anticipate only limited potential for upward movement.

ANTICIPATED FINANCIAL DEVELOPMENT OF THE GROUP

We are making the following assumptions:

- moderate global economic growth
- constant inflation rate
- continuing very low interest rates
- no sudden upheavals on the capital markets
- no exchange rate shocks
- no significant fiscal or regulatory changes
- a large loss burden in line with our expectations

We provide forecast figures at year-end for the key figures at the Talanx Group and its divisions that the Group uses to control its business operations. The Life/Health Reinsurance segment generated earnings of EUR 100 million in the second quarter as a result of releasing hidden reserves in connection with the restructuring of shares at the Viridium Group. This boosted Talanx's Group net income by EUR 50 million on account of its holdings. Business has also developed well in the current year and so, after the first six months, we are more optimistic overall about the results of our business activities this year and now anticipate Group net income of over EUR 900 million.

LIFE/HEALTH REINSURANCE

In the forecast for 2019 in the 2018 Annual Report, we expected average EBIT growth of over 5% (average over a three-year period) in the Life/Health Reinsurance segment. Thanks to earnings of EUR 100 million in the second quarter due to releasing hidden reserves, we now expect to significantly exceed this target of over 5%. The reason behind this is a restructuring of shares at the Viridium Group, with Hannover Rück SE's interest remaining largely unchanged, which became necessary as part of the acquisition of Generali Lebensversicherung AG by Viridium. Due to our shareholding, around EUR 50 million of this will be recognised at the Talanx Group as income or expenses.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

I. BASIS OF PREPARATION AND APPLICATION OF IFRS

BASIS OF PREPARATION

The consolidated half-yearly financial report as at 30 June 2019 was prepared in accordance with International Financial Reporting Standards (IFRSs), as adopted by the European Union. The condensed consolidated financial statements, consisting of the consolidated balance sheet, consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of changes in equity, consolidated cash flow statement and selected explanatory notes, also comply with the requirements of IAS 34 "Interim Financial Reporting".

The accounting policies applied are the same as in the previous annual report and the associated interim reporting period, except for the first-time application of new and amended standards, as explained below.

As allowed by IAS 34.41, we make greater use of estimation methods and assumptions in preparing the interim consolidated financial statements than we do in preparing the annual financial reports. There were no changes in estimates during the interim reporting period with a material effect on the Group's net assets, financial position and results of operations. The tax expense (income taxes in Germany, comparable income taxes at foreign subsidiaries and changes in deferred taxes) is calculated for interim reporting periods by applying the effective tax rate expected for the full year to net income for the period. Pension provisions are extrapolated for interim reporting periods by recognising the actuarially estimated effect of interest rate changes on pension liabilities at the end of the interim reporting period in other comprehensive income ("Other reserves"). Other actuarial assumptions are not updated for interim reporting periods.

The interim financial statements were prepared in euro (EUR). The amounts shown have been rounded to millions of euro (EUR million). This may give rise to rounding differences in the tables presented in this report. As a rule, amounts in brackets refer to the prior year.

APPLICATION OF NEW AND REVISED STANDARDS/ INTERPRETATIONS

The Group applied the following revised IFRS regulations as at 1 January 2019:

IFRS 16 "Leases" includes new regulations for accounting by lessees. A lease liability is to be recognised for every lease. At the same time, the lessee capitalises a right-of-use asset for the underlying asset. The lessor's accounting remains virtually unchanged in comparison to the previous approach, under which leases are classified either as finance or operating leases. The Group applies the standard retrospectively in a modified form and recognises the cumulative effects from the introduction of the standard in retained earnings as at 1 January 2019. The previous year figures are therefore not restated. The Group made use of the simplification rule regarding the retention of the definition of a lease during the transition. This means that the Group applied IFRS 16 for all contracts concluded before 1 January 2019 that were identified as leases in accordance with IAS 17 and IFRIC 4. In addition, the Group used the simplification regulations for short-term leases and leases for which the underlying asset is of low value, as well as all practical expedients under IFRS 16.C10. The incremental borrowing rate applied was calculated taking into account the currency and local factors at the individual companies and, in the Group, ranges from 0.8% to 4.0%. Right-of-use assets of EUR 466 million were capitalised and lease liabilities of EUR 464 million were recognised as at 1 January 2019. These essentially comprise leases in connection with real estate. Including the reversal of deferrals and accruals and taking into account deferred income taxes, applying the standard increased retained earnings by EUR 2 million.

Furthermore, several other amendments of Standards and Interpretations were introduced that had no material impact on the consolidated financial statements:

- IAS 28 “Investments in Associates and Joint Ventures”: non-current investments in associates and joint ventures
- IAS 19 “Employee Benefits”: plan amendments, curtailments and settlements
- Amendments in the context of the annual improvements (2015–2017 cycle): amendments to IFRS 2, IFRS 11, IAS 12 and IAS 23
- IFRIC 23 “Uncertainty over Income Tax Treatments”

IMPACT OF ISSUED STANDARDS, INTERPRETATIONS AND REVISIONS THAT HAVE NOT YET BEEN APPLIED BY THE GROUP IN 2019

The Group still meets the conditions for application of the amendments to IFRS 4 “Application of IFRS 9 and IFRS 4” published in 2016 to temporarily postpone the application of IFRS 9 “Financial instruments”. Under the deferral approach, the application of IFRS 9 for the recognition of financial instruments can be temporarily postponed until IFRS 17 “Insurance contracts” is expected to take effect on 1 January 2022. Please see the previous year’s consolidated annual financial report for further information on the effects of applying IFRS 9 and IFRS 17.

II. SEGMENT REPORTING

The description of the business activities, the divisions and the reportable segments of the Talanx Group in the 2018 Annual Report, as well as the products and services with which these earnings are generated, is still accurate as at the end of the reporting period. The

general specifications about segment reporting given there and the statements about the measurement basis for the performance of the reportable segments are still applicable.

III. CONSOLIDATION

BASIS OF CONSOLIDATION

As at the reporting date, 150 (150) individual companies, 22 (23) investment funds, three (three) structured entities and five subgroups (including four foreign subgroups) were consolidated as a group (including associates) in Talanx's consolidated financial statements, and six (six) companies were included using the equity method.

Significant changes in the basis of consolidation compared with year-end 2018 are presented in the following.

SIGNIFICANT ADDITIONS AND DISPOSALS OF CONSOLIDATED SUBSIDIARIES

With economic effect from 1 January 2019, Hannover Rück SE (Property/Casualty Reinsurance segment) sold 50.22% of shares in HDI Global Specialty SE (HGS) to HDI Global SE (Industrial Lines segment) in an intragroup transaction. Indirect non-controlling interests in HGS fell from 49.78% to 24.78% as a result of the transaction, causing equity attributable to non-controlling interests to decline by EUR 21 million.

In March 2019, all shares in the real estate company Mustela s. r. o., Prague, Czech Republic, were sold for a purchase price of EUR 77 million via HR GLL Europe Holding S.à.r.l. Luxembourg, Luxembourg.

Shares were restructured as part of the acquisition of Generali Lebensversicherung AG by the Viridium Group. In this context, Hannover Re sold its indirect interests in Viridium, generating income of EUR 100 million which was recognised in net investment income. In turn, Hannover Re simultaneously acquired an indirect interest in the Viridium Group, including Generali Lebensversicherung AG, and so it still has a shareholding of around 17%.

IV. NON-CURRENT ASSETS HELD FOR SALE AND DISPOSAL GROUPS

HDI SEGUROS S. A., SAN ISIDRO, PERU (RETAIL INTERNATIONAL SEGMENT)

As at 31 December 2018, the Group had reported its subsidiary HDI Seguros S. A., San Isidro, Peru, held by HDI International AG, Hannover, as a disposal group with assets of EUR 9 million and liabilities of EUR 6 million. With effect from 27 March 2019, the Group transferred its 100% interest to the buyer for a price at the lower end of the single-digit million euro range.

HDI SEGUROS DE VIDA S. A., SANTIAGO, CHILE (RETAIL INTERNATIONAL SEGMENT)

The Group is planning to sell the 100% interest in HDI Seguros de Vida S. A., Santiago, Chile, held by HDI International AG, Hannover. The disposal group contains assets of EUR 15 million and liabilities of EUR 9 million. The main carrying amounts for the disposal group relate to "capital investments" (EUR 11 million), "cash at banks, cheques and cash-in-hand", "accounts receivable on insurance business" and "deferred tax assets" (each EUR 1 million), "technical provisions" (EUR 6 million) and "liabilities" totalling EUR 3 million. The transaction is expected to be completed in 2019. The Group plans to use the sale to optimise its portfolio in South America.

ITAS VITA S.P.A., TRENTO, ITALY (LIFE/HEALTH REINSURANCE SEGMENT)

By resolution of the Board of Management of Hannover Rück SE dated 24 June 2019, the company ITAS Vita S. p. A., Trento, Italy – which is available for sale and was previously accounted for using the equity method – was recognised as an "asset held for sale". Hannover Rück SE holds a 27.1% share in the company. No depreciation costs were incurred as a result of measuring at the lower value of carrying amount and fair value less costs to sell. At the time of reclassification and as at the reporting date, the carrying amount of the company was EUR 47 million.

REAL ESTATE

We report property holdings as held for sale in the amount of EUR 100 (6) million as at the reporting date.

V. NOTES TO INDIVIDUAL ITEMS OF THE CONSOLIDATED BALANCE SHEET

The principal items of the consolidated balance sheet are as follows:

(6) DISCLOSURES ON FAIR VALUE AND THE FAIR VALUE HIERARCHY FAIR VALUE HIERARCHY

FAIR VALUE HIERARCHY

The disclosures in accordance with IFRS 13 "Fair Value Measurement" require financial instruments measured at fair value to be allocated to a three-level fair value hierarchy. One goal of this requirement is to reveal the link between market inputs and the data used in determining fair value. The following classes of financial instruments are affected: financial instruments available for sale, financial instruments at fair value through profit or loss, other investments and investment contracts (financial assets and liabilities) that are measured at fair value, other liabilities (negative fair values of derivative financial instruments) and hedging instruments (derivatives used in hedge accounting).

The guideline for the allocation to the individual levels of the valuation hierarchy and of the valuation process, the valuation models for measuring fair value, the essential input factors, the essential level 3 portfolios and the statements on the sensitivity analysis have not materially changed compared to the description in the 2018 Annual Report. The fair value of level 3 financial instruments at which the use of reasonable alternative inputs leads to a material change in fair value is EUR 117 (110) million and, at 2.4% (2.4%) of the carrying amount of financial instruments assigned to level 3, is immaterial.

As at the reporting date, we allocate around 5% (4%) of the financial investments at fair value at level 1 of the fair value hierarchy, 90% (90%) at level 2 and 5% (6%) at level 3.

There were no material transfers between levels 1 and 2 in the reporting period.

There are no liabilities (31 December 2018: none) issued with an inseparable third-party credit enhancement within the meaning of IFRS 13.98 as at the reporting date.

FAIR VALUE HIERARCHY – FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE

EUR MILLION

Carrying amount of financial instruments recognised at fair value by class	Level 1	Level 2	Level 3 ¹⁾	Carrying amount

(13) NET INVESTMENT INCOME BY ASSET CLASS**NET INVESTMENT INCOME BY ASSET CLASS**

EUR MILLION

	6M 2019	6M 2018
Shares in affiliated companies and participating interests	102	4
Loans and receivables	499	486
Financial assets held to maturity	8	11
Financial assets available for sale		
Fixed-income securities	1,007	1,030
Variable-yield securities	48	43
Financial assets classified at fair value through profit or loss		
Financial assets classified at fair value through profit or loss		
Fixed-income securities	33	12
Variable-yield securities	18	-2
Financial assets held for trading		
Variable-yield securities	1	-
Derivatives	57	61
Other investments, insofar as they are financial assets	148	254
Other ¹⁾	102	122
Total assets under own management	2,023	2,021
Investment contracts: investments/liabilities ²⁾	1	-
Funds withheld by ceding companies/funds withheld under reinsurance treaties	87	106
Total	2,111	2,127

¹⁾ For the purposes of reconciliation to the consolidated statement of income, the "Other" item combines the gains on investment property, associates and joint ventures, and derivative financial instruments where the fair values are negative. Derivatives held for hedging purposes included in hedge accounting are not included in the list if they do not relate to hedges of investments.

²⁾ Includes income and expenses (net) from the management of investment contracts amounting to EUR 0 (0) million. Financial instruments (assets/liabilities) measured at fair value through profit or loss account for income of EUR 48 (52) million and expenses of EUR -45 (-50) million, while loans and receivables and other liabilities account for income of EUR 0 (1) million and expenses of EUR 0 (0) million. In addition, expenses include amortisation of PVFP amounting to EUR -2 (-3) million.

Including investment management expenses of EUR 78 (71) million and other expenses of EUR 47 (49) million, net investment income at the reporting date totalled EUR 1,986 (2,007) million.

VII. OTHER DISCLOSURES**NUMBER OF EMPLOYEES**

The Talanx Group's total workforce at the reporting date numbered 22,834 (22,642).

RELATED PARTY DISCLOSURES

Related parties in the Talanx Group include HDI Haftpflichtverband der Deutschen Industrie Versicherungsverein auf Gegenseitigkeit (HDI V.a.G.), which directly holds the majority of the shares of Talanx AG, all subsidiaries that are not consolidated on the grounds of insignificance, as well as associates and joint ventures. In addition, there are the provident funds that pay benefits in favour of employees of Talanx AG or one of its related parties after termination of their employment. Individuals classed as related parties are the members of the Board of Management and the Supervisory Board of Talanx AG and HDI V.a.G.

Transactions between Talanx AG and its subsidiaries are eliminated in the course of consolidation and hence not disclosed in the Notes.

There is a cooperation agreement between Talanx AG and HDI V.a.G. which allows Talanx AG to offer subordinated bonds to HDI V.a.G. with a volume of up to EUR 500 million on a revolving basis until 2021. Talanx AG is obliged to convert these bonds into registered shares with voting rights in the event of an increase in capital with pre-emptive rights. With the conversion of these bonds, HDI Haftpflichtverband der Deutschen Industrie V. a. G. waives its pre-emptive rights resulting from the capital increase that led to the conversion. It does so for that number of new Talanx shares that corresponds to the number of Talanx shares that HDI Haftpflichtverband der Deutschen Industrie V.a.G. will receive in the course of the obligatory conversion of the bond – i.e. only to the extent to which new shares resulting from the capital increase are replaced by shares resulting from the conversion.

Other business relationships with unconsolidated companies, associates or joint ventures are insignificant overall.

OTHER DISCLOSURES ON FINANCIAL INSTRUMENTS

As at the end of the reporting period, in the context of a securities lending transaction, the Group recognised securities that were lent to third parties in exchange for collateral in the form of securities. The loaned securities are still reported on the balance sheet as their significant risks and opportunities remain with the Group, while the securities received as collateral have not been recognised. The carrying amount of financial assets in the “financial assets available for sale” category on loans in securities lending transactions was EUR 299 (288) million as at the reporting date. The fair value is equivalent to the carrying amount. The components of these transactions recognised as income are shown under “Net investment income”.

As at the end of the reporting period, the Group also recognised securities in the “financial assets available for sale” category that were sold to third parties with a repurchase commitment at a fixed price (genuine repurchase transactions), as the principal risks and opportunities associated with the financial assets remained within the Group. As at the reporting date, the carrying amount of transferred financial assets from repo transactions was EUR 257 (3) million,

with the associated liabilities also at EUR 257 (3) million. The difference between the amount received for the transfer and the amount agreed for the return is allocated for the term of the repurchase transaction and recognised in net investment income.

LITIGATION

We were not involved in any significant new litigation in the reporting period or at the end of the reporting period in comparison to 31 December 2018.

EARNINGS PER SHARE

Earnings per share are calculated by dividing Group net income attributable to the shareholders of Talanx AG by the average number of outstanding shares. There were no dilutive effects, which have to be recognised separately when calculating earnings per share, either at the reporting date or in the previous year. In the future, earnings per share may be potentially diluted as a result of the share or rights issues from contingent or authorised capital.

EARNINGS PER SHARE

	6M 2019	6M 2018	Q2 2019	Q2 2018
Net income attributable to shareholders of Talanx AG for calculating earnings per share (in EUR million)	477	437	242	219
Weighted average number of ordinary shares outstanding	252,797,634	252,797,634	252,797,634	252,797,634
Basic earnings per share (in EUR)	1.89	1.73	0.96	0.87
Diluted earnings per share (in EUR)	1.89	1.73	0.96	0.87

DIVIDEND PER SHARE

In the second quarter of 2019, a dividend of EUR 1.45 per share was paid for financial year 2018 (in 2018 for financial year 2017: EUR 1.40), resulting in a total distribution of EUR 367 (354) million.

CONTINGENT LIABILITIES AND OTHER FINANCIAL COMMITMENTS

Outstanding capital commitments from investments in private equity funds as at 30 June 2019 increased by EUR 707 million to EUR 3,070 (2,363) million. There were no other significant changes in contingent liabilities or other financial commitments in the reporting period compared with 31 December 2018.

REVENUE

Revenue from contracts with customers covered by IFRS 15 is predominantly recognised over a period of time and breaks down as follow:

REVENUE CATEGORY

EUR MILLION

	6M 2019	6M 2018
Capital management services and commission ¹⁾	98	103
Other insurance-related services ²⁾	75	70
Income from infrastructure investments ²⁾	34	32
Total revenue³⁾	206	205

¹⁾ Revenue predominantly recognised over a period of time.

²⁾ Revenue recognised over a period of time.

³⁾ Revenue is recognised in the income statement in the amount of EUR 166 (167) million under "10.a. Other income", in the amount of EUR 34 (32) million under "9.a. Investment income" and in the amount of EUR 7 (6) million in "Net income from investment contracts".

EVENTS AFTER THE END OF THE REPORTING PERIOD

There were no significant events after the reporting date that would have a material impact on the net assets, financial position and results of operations of the Group.

Prepared and hence authorised for publication in Hannover on 2 August 2019.

REVIEW REPORT

TO TALANX AG, HANNOVER

We have reviewed the condensed interim consolidated financial statements – comprising the consolidated balance sheet, consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of changes in equity, consolidated cash flow statement and selected explanatory notes – and the interim Group management report of Talanx AG, for the period from 1 January to 30 June 2019, which are components of the half-yearly financial report in accordance with section 115 of the German Securities Trading Act (WpHG). The preparation of the condensed interim consolidated financial statements in accordance with the IFRSs applicable to interim financial reporting, as adopted by the EU, and of the interim Group management report in accordance with the requirements of the WpHG applicable to interim group management reports, is the responsibility of the Company's Board of Management. Our responsibility is to issue a review report on the condensed interim consolidated financial statements and the interim Group management report based on our review.

We performed our review of the condensed interim consolidated financial statements and the interim Group management report in accordance with German generally accepted standards for the review of financial statements promulgated by the Institute of Public Auditors in Germany (IDW). Those standards require that we plan and perform the review so that we can preclude through critical evaluation, with a certain level of assurance, that the condensed

interim consolidated financial statements have not been prepared, in all material respects, in accordance with the IFRSs applicable to interim financial reporting, as adopted by the EU, and that the interim Group management report has not been prepared, in all material respects, in accordance with the requirements of the WpHG applicable to interim group management reports. A review is limited primarily to inquiries of company employees and analytical procedures and therefore does not provide the assurance attainable in a financial statement audit. Since, in accordance with our engagement, we have not performed a financial statement audit, we cannot issue an auditors' report.

Based on our review, no matters have come to our attention that cause us to presume that the condensed interim consolidated financial statements have not been prepared, in all material respects, in accordance with the IFRSs applicable to interim financial reporting, as adopted by the EU, or that the interim group management report has not been prepared, in all material respects, in accordance with the requirements of the WpHG applicable to interim group management reports.

RESPONSIBILITY STATEMENT

To the best of our knowledge, and in accordance with the applicable reporting principles for interim financial reporting, the interim consolidated financial statements give a true and fair view of the net assets, financial position and results of operations of the Group, and the interim management report of the Group includes a fair review of the development and performance of the business and the position of the Group, together with a description of the material opportunities and risks associated with the expected development of the Group for the remaining months of the financial year.
